

CLIMATE CONNECT

- a global platform to accelerate climate action -

THE IDEA:

In order to prevent life on earth from detrimental climate change, we are creating a global platform that connects all people who are taking action against the climate crisis in order to help them reach the maximum positive impact with their work.

KEY FEATURES

- Organisations and individuals can list their climate action projects. The platform will show the climate impact for each project.
- Providing blue prints of possible high-impact projects to organisations.
- Matching climate-projects, that need support in a specific area, with people who have the necessary skills.
- Depending on each project type, an algorithm automatically calculates the climate impact of the project.
- The climate impact of projects is going to be peer reviewed by reputable users.

KEY BENEFITS

- Providing a comprehensive, structured and up to date list of what is being done about climate change.
- A simple and free way to measure the impact of each activity.
- Ensuring the accuracy of the impact calculation through a system similar to Wikipedia.
- Encouraging the replication of local/sectoral high-impact projects in other locations/sectors.
- Create a synergy among various actors to help them to maximize their impact.
